Successful completion (grade of C or better) of: <ul style="list-style-type: none"> • High school Chemistry with a lab, OR • Adult Education Chemistry with a lab, OR • College Chemistry with a lab. 	Chemistry is not a requirement for admissions to the RT program. <i>It is strongly recommended.</i>	
These classes will fulfill requirements in the RT program:		
BIO-213 Anatomy & Physiology I		
BIO-214 Anatomy & Physiology II		
CHE-113 Biochemistry		
COM-104 Introduction to Communication		
ENG-101 College Composition		
PSY-101 Introduction To Psychology		
MAT-117 College Algebra		
Humanities Elective		
Computer Elective		

**** NOTE: The required composite score is set from Sept 2011 through August 2012. KVCC reserves the right to change this score at the beginning of an academic year.**

Updated 11/21/2011

Notice to Applicant

Criminal Background Checks

Applicants to certain programs need to note that a criminal background check will likely be required while enrolled in the program or as a condition of employment in the field. Certain internship and/or practicum sites, such as health care facilities, may limit or deny clinical privileges to those students who have a prior or current criminal record.

- Should a clinical facility refuse to permit a student to complete a clinical rotation based upon the student's criminal background check, the student may not be able to complete the program. In the event a student is denied placement at a clinical site the college will likely be required to enter an academic dismissal from the program.
- Additionally, certain licensing boards may refuse to issue a license to practice based upon prior or current criminal offense (s). To learn more about whether the program or profession in which you are interested has such requirements or limitations, contact the appropriate Department Chair.

Infectious Diseases

Applicants who consider a career in Nursing or the Allied Health professions should be aware that during the course of their education and subsequent employment, they will be working in situations where exposure to infectious diseases is probable. This is an occupational risk for all health care workers. Persons should not become health care workers unless they recognize and accept this risk. Proper education and strict adherence to well-established infection control guidelines, however, can reduce the risk to a minimum. Thorough education in infection control procedures is an integral part of each health care program.

Exposure to Latex

Additionally, applicants should be aware that exposure to natural rubber latex (NRL) is likely. Individuals exposed to NRL products may develop allergic reactions such as skin rashes; hives; nasal, eyes, or sinus symptoms; and, rarely, shock.

Costs

Costs associated with required immunizations, criminal background checks, finger printing (when applicable) and admission testing are the responsibility of the applicant.
