# **CAREER STUDIES**

## ASSOCIATE IN APPLIED SCIENCE DEGREE PROGRAM

The Career Studies program is a highly individualized program of study that takes into account all the life experience that a person has had in the work world. Students can earn up to 24-credit hours by showcasing previous experiences through a Prior Learning portfolio which connects past work to college course outcomes. Students build a portfolio that documents their experience and how it aligns with the outcomes of college courses. Students then take other classes to complete the degree.

"My career was sort of stuck since I did not have a college degree. When I learned about the Career Studies degree, I had to check it out. It took me half as long to finish thanks to the program. Now I can be promoted at my company and become a supervisor."

"The biggest problem I face in my company is not having workers whose skills are matched by their credentials. We need both the skills and credentials that certify professional level."

## Count your life experience to fast-track toward a degree

## What Career Studies graduates do:

3		3
3		3 3
		3 3
		24 credits required
	Total Credits	63 credits (minimum)

This program is accessible 100% online.

## **CAREER STUDIES**

## **Associate in Applied Science Degree Program**

## **DESCRIPTION**

The purpose of the Associate in Applied Science Degree in Career Studies is to provide highly individualized and flexible programming to meet the needs of students with significant work and learning experiences whose educational and/or occupational goals cannot be met by the other programs of the College.

### **PROGRAM MISSION**

The mission of Career Studies is to provide flexible curriculum for students who have unique career goals that cannot be met by other academic programs. Students will have significant career experience that can be documented through "prior learning" assessments.

### **EDUCATIONAL OUTCOMES**

The objectives of the Career Studies Program include:

- 1. Recognizing significant work and/or learning experiences in a broad range of technical, business and specialized career skills.
- Enhancing educational opportunities for those students who already possess a significant basis of skill and/ or learning.
- 3. Assisting individuals to advance in their chosen occupations.

### **COLLEGE ADMISSION**

General admission guidelines can be found on page 33 in the catalog.
